Pulcra is a worldwide operating company and supplier of innovative specialty products with profound process and engineering know-how. Based on more than 135 years of experience and partnering with customers, Pulcra takes care of both the regulatory requirements in our most important target markets and also the prevailing trends relating to health and safety and ecological sustainability.

We are present in all relevant markets while eagerly identifying new business opportunities and flowering markets.

We are committed to finding a healthy balance between economic, ecological, and social demands, without compromising the development opportunities of future generations.

Pulcra aims to significantly optimize all its business processes from administration over production to logistics and to responsibly use renewable raw materials in order to being a minimum environmental burden. We recognize that saving energy and natural resources means not only being economical successful today but more important being actively in line with a flowering tomorrow.

Together with our exemplary social commitment and the continuous development and training of our employees, this approach is the key to our philosophy of sustainable development.

WELCOME TO PULCRA!

Pulcra is a worldwide operating company and supplier of innovative specialty products with profound process and engineering know-how. Based on more than 135 years of experience and partnering with customers, Pulcra takes care of both the regulatory requirements in our most important target markets and also the prevailing trends relating to health and safety and ecological sustainability.

We are present in all relevant markets while eagerly identifying new business opportunities and flowering markets.

SUSTAINABILITY IN LINE WITH TOMORROW

We are committed to finding a healthy balance between economic, ecological, and social demands, without compromising the development opportunities of future generations.

Pulcra aims to significantly optimize all its business processes from administration over production to logistics and to responsibly use renewable raw materials in order to being a minimum environmental burden. We recognize that saving energy and natural resources means not only being economical successful today but more important being actively in line with a flowering tomorrow.

Together with our exemplary social commitment and the continuous development and training of our employees, this approach is the key to our philosophy of sustainable development.

YOUR BENEFITS

- Broad range of food defoamers – Made in Germany
- Dedicated production units for our Food Defoamer Product Range
- Customized solutions delivering highest technical standards with a minimum waste of natural resources by optimized processes
- Directly access Pulcra’s global network of technical experts sites around the world: e.g. Germany, USA, China, Spain, Turkey, Italy, Brazil
- Select the best supplier conditions for you in terms of logistics and currency
- Kosher Passover/Halal certified
- ISO 9001/14001/50001 certified

HISTORY – IT ALL STARTED WITH HENKEL

1876
Henkel

1879
Adolf Theodor Böhme
(Later: Dr. Th. Böhme)

1906 – 1935
H. Theodor Böhme
Later: Böhme Fettchemie

1999 – 2007
Cognis

2007 – 2008
Foundation & independence of Pulcra group

2010
01. April takeover Dr. Th. Böhme production facility in Geretsried and today’s headquarters

1941 – 1986

1986 – 2007
Pulcra: (latin) pure (both physically and spiritually), clean

2010
01. April takeover Dr. Th. Böhme production facility in Geretsried and today’s headquarters
Reliability, product-, process know-how and immediate problem-solving is the key criteria for creating added value for its customers and Pulcra is ready to serve the needs of different industries. Our mission is to help our customers perform better in their areas with a strong support from our deep knowledge delivered by our team of 300 engineers from our 14 locations across the globe.

Our expert teams are always ready to give you the best technical service. We develop customized solutions especially designed to your needs.

In the food and non-food processing industries, foam formation creates a lot of problems in production. The BREVIOL® defoamer product range for the food application prevents initial foam formation or lead to a quick reduction of foam level. Therefore the production is running continuously without breakdown. Our BREVIOL® antifoam agents meet a wide range of requirements and applications.

PULCRA FOR THE FOOD INDUSTRY

CUSTOMER SOLUTIONS

In order to deliver customer-specific solutions, Pulcra relies on customized formulations rather than standard ones. Our defoamer product range, especially developed for the food industry, meets today’s requirements in terms of performance as well as product safety.

FOAM CONTROL AGENTS ARE SURFACTANTS
SPECIALY DESIGNED WITH THE FOLLOWING BENEFITS:

- Quick reduction of foam level
- Exceptional holdout effects on foam
- Negligible impact on oxygen transfer
- Low toxicity to micro organisms
